TRANSMITTAL OF INFORMATION DISCLOSURE STATEMENT

Dear Sir:

Transmitted herewith is an Information Disclosure Statement disclosing information which has come to the attention of applicant and/or his attorneys and is being submitted so as to comply with the duty of disclosure set forth in 37 C.F.R. § 1.56. In accordance with 37 C.F.R. § 1.97(b), the enclosed Statement is being filed within three (3) months of the filing date of the above-identified application or before the mailing date of a first Action on the merits.

Neither applicant nor his attorneys make any representation that any information disclosed herein may be "prior art" within the meaning of that term under 35 U.S.C. § 102 or § 103. Moreover, pursuant to 37 C.F.R. § 1.97, the filing of this Information Disclosure Statement shall not be construed as a representation that a search has been made or as an admission that the

information cited herein is, or is considered to be, material to patentability as defined in 37 C.F.R. § 1.56(b).

In accordance with 37 C.F.R. § 1.98, transmitted herewith are:

1. A completed copy of Form PTO/SB/08a "Information Disclosure Statement by Applicant" listing the patents, publications and other information being submitted for consideration; and
2. A legible copy of each patent, publication and other item of information in written form listed on the enclosed Form PTO/SB/08a (for applications filed after June 30, 2003), except for copies of U.S. patents and published U.S. patent applications which are not required for applications filed after June 30, 2003.

NON-ENGLISH INFORMATION

Pursuant to 37 C.F.R. § 1.98, following is a concise explanation of the relevance (as it is presently understood by the individual designated in 37 C.F.R. § 1.56(c) most knowledgeable about the content of the information), of each listed patent, publication or other information that is not in the English language:

1. German Patent No. DE10066100 published January 9, 2003, discloses: The crushing machine has jaw crushers with fixed and moving jaw pairs. The jaw crushers are above roll-jaw crushers. The two crusher systems have a common drive for all the rolls and jaw pairs. The jaw crushers have the moving jaws moved by a pushrod via a crank mechanism.
2. German Patent No. 9401617 published November 10, 1994, was cited in the International Search Report as a Category A Reference. Abstract: Jaw crusher for crushing hard materials. The innovation concerns a jaw crusher for crushing hard materials, with a stationary jaw and a mobile jaw, which are tiltable around an axis at their upper end.
3. Japan Application No. 06123142 published November 21, 1995, discloses: PURPOSE: To prevent troubles in crushing work caused by the clogging of long reinforcements in a crusher by installing a cutter for cutting reinforcements on the lower side of the crushed

JC20 Rec'd PCT/PTC 21 SEP 2005

material discharging part of the crusher. CONSTITUTION: A cutter 20 is installed on the lower side of the crushed material 8 discharging part of a crusher to be positioned on the upper side of the rear end of a belt conveyer. When the material 8 contains reinforcements 31 for reinforced concrete etc., a rotary cutter 25 is rotated by a hydraulic motor 24. The reinforcements are cut into small pieces by the rotary cutter 25 and fixed blades 23 to be discharged by a belt conveyer. In this way, troubles in crushing work are prevented, and the removal of the reinforcements is dispensed with.

Respectfully submitted,

Evan R. Witt
